STATEMENT OF WORK EAST PERIMETER FENCE RESTORATION CAMP BONNEVILLE VANCOUVER, WASHINGTON

1.0 Project Background. Camp Bonneville, Washington is a 3,840 acres site scheduled for base closure under the Base Realignment and Closure Act (BRAC) 95. Camp Bonneville (BNVL) is located northeast of Vancouver Washington. The general location of BNVL is shown in Figure 1 and the boundary of BNVL is shown on Figure 2.

Munitions training occurred at BNVL until the installation was closed in 1995. Investigation to determine the location and extent of fired munitions was initiated in 1997 and continued to 2003. The munitions investigation included all BNVL roads and trails plus a 30 foot wide buffer zone. In 1993 brush and fallen timber was removed from the trail along the east boundary of BNVL. Following the timber removal, a dozer cleared and leveled the trail to restore vehicle access for brush and forest fire control. A munitions investigation in 2001, conducted by explosives ordnance disposal personnel using instruments to detect munitions, included the trail along the east perimeter adjacent to the fence line to be restored.

No munitions were found during either the 1993 road construction or the 2001 investigation thus it is highly unlikely munitions will be encountered during the fence restoration. But as a precaution if the contractor personnel happen to see what appears to be a piece of munitions while working on BNVL property on the west side of the fence line, the contractor shall mark the location and contact either of the individuals listed in the points of contact below.

2.0 Project Purpose. To restore the five-strand barbed wire fence and replace warning signs along the east perimeter of BNVL as shown on Figure 3. Additional fencing installation details are shown on Figure 4 and Specification Section 02821.

3.0 Signage. The warning signs will be furnished by the government and will be provided to the contractor for posting. The signs are made of 8-inch by 11-inch rectangle metal with 4 drill holes suitable for posting using hog ring or wire fasteners. The signs state: "DANGER EXPLOSIVE HAZARD NO TRESPASSING US GOVERNMENT MILITARY AREA," see Figure 6. The signs will be placed every 50 feet of perimeter fence line. It is estimated the number of signs to be posted is 110.

4.0 Site Access. Site access to the perimeter fencing is shown on Figure 3. The access is across a northern and southern trail easement through residential property on The Summit at Autumn Hills. Work on the perimeter fence will be conducted along the trail easement bordering the west side of Autumn Hills and the east side of Camp Bonneville. The trail easement may become impassable during rain events.

Autumn Hills is a gated community and an entry code is required for access. The contractor will be provided a code for the duration of the contract. The Corps' project manager will obtain the entry code. The code is usable from 6:00 a.m. to 6:00 p.m. Monday thru Friday only. Limited parking for eight vehicles is available in the cul-de-sac at the southern trail head at 8200 NE 297th Court and the cul-de-sac at the northern trail head at 9721 NE Livingston Mountain Court. The parked vehicles shall not block residence driveways or traffic flow in the cul-de-sacs.

5.0 Payment. Payment will be made in accordance with the items identified on Figure 7 - Bid Schedule and Specification Section 01025 - Measurement and Payment upon completion and final inspection of the project.

6.0 Schedule.

=====

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

In the listing above, the "SU" designation means that rates listed under the identifier do not reflect collectively bargained wage and fringe benefit rates. Other designations indicate unions whose rates have been determined to be prevailing.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- * an existing published wage determination
- * a survey underlying a wage determination
- * a Wage and Hour Division letter setting forth a position on a wage determination matter
- * a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.
